

# The Certificate Maker Database

This customized database is a great tool to create certificates for your company or organization. Not only will it print your customized certificates with your name and logo, but this database has numerous other time saving tasks as well.

The screenshot shows the 'Certificate Maker' software interface. It has a menu bar with 'File', 'Edit', 'Print', and 'Help'. Below the menu bar are two small certificate preview images. The main area contains several input fields: 'Certificate ID #', 'Certificate Date', 'Certificate Issued to', 'Title of Certificate', 'Organization/Institution Name', 'Number of Certificates', and 'Description of Certificate'. A 'Generate Certificates' button is at the bottom left.
